

# SCHOOL WORKSHOPS

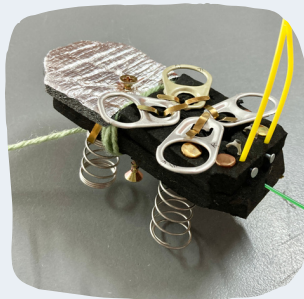

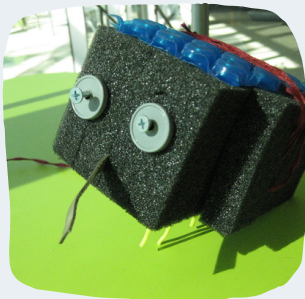

## SCIENCE WORKSHOPS

### Mini-Monsters

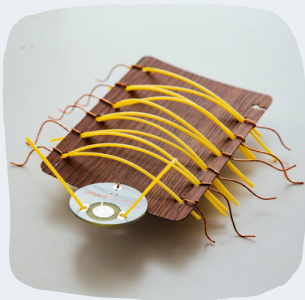

Build a mini-monster straight out of your imagination. What creatures could we create? How many eyes will it have? Does it have a name?

### Living Movement

A focus on insects and animals that move along the ground, includes creatures like spiders, centipedes, mammals and lizards.

### Junk Bugs: Bugs at Large

Use your imagination to create new and interesting bugs, let your imagination be your guide. Explore different aspects of how bugs move, eat and live.

# SCHOOL WORKSHOPS

## SCIENCE WORKSHOPS

### Connections to Nature

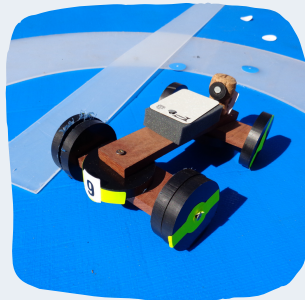

Let's immerse ourselves in nature and explore our surroundings.

What can we find and what can we collect? Let's use our found materials to build something out of our imagination.

Is it a bug? Is it a sculpture?

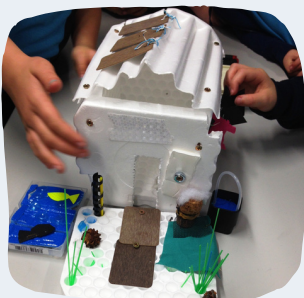

## TECHNOLOGY WORKSHOPS

### Green Machines

How would cars, trains and planes work in the absence of fossil fuels? Let's build some and find out together!

### RE-use Technology

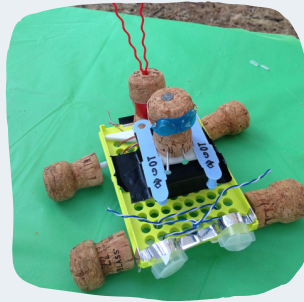

Diorama your idea of the future by building a mini city in a small group. The workshop is a good conversation starter about how we can create a better and more sustainable way of living by using items normally thrown away.

# SCHOOL WORKSHOPS

## ENGINEERING WORKSHOPS

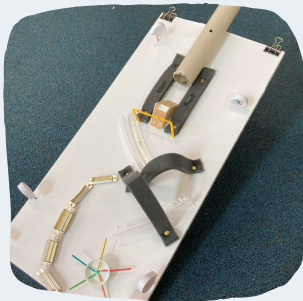

### Wheels and Gears: Make It Move

Get creative and see what you can build that moves. It may be a windmill, robot or puppet, but can you make it move?

What about a bug on wheels?

### Marble Runs

Challenge your engineering skills and have lots of fun in the process. Build a marble run and experience science in action. This is a good activity for the participants to work in small groups.

# SCHOOL WORKSHOPS

## ARTS WORKSHOPS

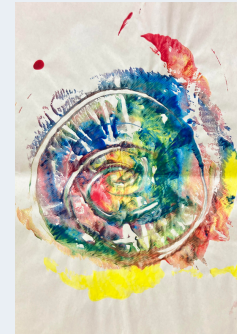

### Garden Guru/Scarecrows

A REmida classic and one of our most popular workshops. Make a scarecrow for your outside area or classroom. The activity works best with small groups building each component of the scarecrow.

### RE-Prints

Explore the use of REmida materials through paints, inks and dyes. Perfect for any age group!

*Limited to 25 participants per session.*

### Loose Parts Puppets

Another REmida classic. Give free reign to your imagination and create a puppet character then work in a group and use your story telling abilities to create a mini puppet show!

# SCHOOL WORKSHOPS

## ART WORKSHOPS

### Steam Punk Hats

Channel your inner Hatter and use REmida materials to make a standout hat!

## MATH WORKSHOPS

### Math Through Music

Create some instruments then explore the relationship between math and music for example counting, rhythm, patterns, intervals, harmony etc. Great for middle and upper primary classes.

# SCHOOL WORKSHOPS

## 2023 PRICE GUIDE
